Water Service to be Temporarily Interrupted In Areas of Prentis Park

As part of the ongoing construction involved with the Prentis Park Water and Sewer Rehabilitation Project, water will be turned off on Tuesday, April 20th from 11 p.m. until 4 a.m. for residents and businesses located between the 2100 block thru the 2500 block of Elm Avenue and the 1200 block of Fayette Street. The water will be turned off during this time period in order to connect a portion of the new construction to the city's water system.

A trial shut down is planned for Monday, April 19th between the hours of 10 a.m. and 2 p.m. PreCon Construction will distribute notices informing the public of the scheduled water shut downs. In the event of rain the connection will be rescheduled for Wednesday April 21st.

Marked traffic detours will be in place while this work is occurring. For more information, call the Department of Public Utilities at 393-8691.
