### Sewer Bypass Set Up in Olde Towne Due to Collapsed Line

Portsmouth, VA –The Department of Public Utilities announces that a sewer bypass has been set up in Olde Towne at the intersection of Dinwiddie and Glasgow Streets due to a collapsed sewer line. The bypass will be in operation until the sewer line repairs are made next week. This temporary bypass set up will not affect our customers' sewer service.

Until the completion of the sewer line repairs, one lane of traffic will remain closed through the intersection of Dinwiddie & Glasgow Streets to accommodate the pump and pipes used for the sewer bypass.
