City of Portsmouth Requesting Reports of Property Damage

The City of Portsmouth has conducted preliminary damage assessments of the property damage sustained throughout the city due to flooding and wind from Hurricane Irene.

As the next step of the process, to provide the most accurate assessment of damage, the City is requesting that individuals report any wind or flood damage sustained to property as the result of the storm. The most accurate damage assessment information will be valuable for reporting efforts and should federal assistance be made available to flood victims.

Please report property damage as soon as possible by clicking on the link located on the left column of the City of Portsmouth's home page, titled: Report Storm Damage, <http://www.portsmouthva.gov/storm-damage-report-form.aspx> .

In addition, to report storm damage by telephone, please call the Storm Damage Reporting Line at 393-8035. To email reports of storm damage, send information to damageassessment@portsmouthva.gov .
