

Notice

Portsmouth Water Customers South of the Western Branch of the Elizabeth River

The City's contractor will begin adjustments to the City's Water Transmission System serving our customers in areas south of the Western Branch of the Elizabeth River on March 7, 2011. These adjustments are due to the relocation of a portion of the main water line serving the City.

While we do not anticipate any significant issues with this adjustment, it is possible that this work may cause slight discoloration of the water from March 7 – 18, 2011. Customers are urged to check for water discoloration prior to laundering clothes during this period. Should you notice any discoloration, simply turn on your faucet for a few minutes and any discoloration or cloudiness should disappear.

We appreciate your patience. This work will allow the Public Utilities Department to continue to provide a reliable, quality service to you.

If you have any questions, please contact the Portsmouth Public Utilities Department at 393-8561
